Foreword

As PG Impact Investments nears the fifth anniversary, we are excited to continue to bring together private capital, innovation and entrepreneurial talent to provide inclusive solutions to the pressing social and environmental challenges facing our society. 2019 was an eventful year for us as we grew our portfolio by over 75%, set up our Latin America coverage team, opened our Asian office in Singapore and launched an Impact & Value Creation function. In response to growing interest from private and institutional investors for impact investing in emerging markets, PG Impact Investments has now established itself as a platform managing several vehicles in addition to our inaugural fund, PG Impact Investments I L.P.

As a firm we are committed to continuously improving our impact measurement and management practices, ensuring that they evolve along with our strategy, industry practice and our lessons learned. In 2019, we decided to expand our investment universe to selectively consider investments that contribute to positive environmental outcomes, while still prioritizing social impact. In addition, we set out to map our alignment to the newly launched IFC Operating Principles for Impact Management, an emerging standard in the field of impact investing that we believe will foster more transparency and accountability.

As we grow, we have maintained a focus on deployment to extend the breadth and depth of our impact. In 2019, we increased our investment pace – executing thirteen new transactions with newly committed capital of USD 85.6 million – and broadened our impact footprint to new geographies. By the end of the year, with 33 investments and total committed capital of USD 196.2 million, we estimate that we contributed to the improvement of the lives of 3.8 million underserved people. In aggregate, our investees touched over 80.5 million lives across 27 countries – 39% higher than in 2018 due to the addition of new investments throughout the year and the growth of existing portfolio.

In the following pages, you will find an overview of our impact investment approach and a detailed report on the impact created by our investments to date.

We thank all of our investors, business partners and supporters for their trust and valuable contribution. We are humbly thrilled that you share our belief that innovative and inclusion-driven entrepreneurial solutions can make a real difference in people’s lives and their communities. We are excited about the opportunities ahead of us and are thankful for your continued support.

3. Introduction

"We believe that private investment, innovation and entrepreneurial talent can provide solutions to the pressing societal challenges we face today"

Urs Baumann, Co-Founder & CEO

PG Impact Investments invests in opportunities where social and environmental impact goes hand-in-hand with market-rate returns. We believe that social enterprises with both a sound business model and the ability to attract institutional capital are best positioned to generate impact at the scale necessary to make a difference.

PG Impact Investments follows a global, integrated, relative-value investment approach. We invest across a broad range of impact sectors and across the entire capital structure. We have a strong focus on emerging markets with the goal to create impact where the need is highest while achieving risk-adjusted financial returns.

Relative value investing

PG Impact Investments proactively sources its investment opportunities globally through its network of social entrepreneurs, industry experts and platforms, impact investment managers and the local teams of Partners Group’s 20 global offices. To benchmark the global impact investment opportunity set, PG Impact Investments identifies those areas with the greatest potential for financial and social return in the prevailing market environment and defines the sectors, regions and strategies likely to offer higher investment value and impact relative to other segments.

PG Impact Investments believes that this top-down view on the most attractive impact investment opportunities globally, combined with its bottom-up ability to identify and develop the most promising investments within local markets will yield the best result for our clients.

Investment strategies

Our investment approach includes two investment strategies: direct and fund investments.

- Direct investments: we invest in the growth of attractive social enterprises with a proven business model, high development potential and a measurable and scalable social and environmental impact. PG Impact Investments can flexibly invest through equity and debt structures. We work closely with management teams throughout the life of the investments to achieve the growth, value and impact creation targets.

- Fund investments: we complement our direct investments with commitments to select impact investment managers. Through a flexible combination of these investment strategies, PG Impact Investments can benefit from specialist sector and market know-how and build a more diversified, global impact investment portfolio.

Impact sectors and investment focus

PG Impact Investments invests across all impact sectors while prioritizing inclusive finance, SME growth / job creation, affordable housing, energy access, food & agriculture, healthcare and education. For each priority sector, investment strategies have been defined on the basis of the long-term viability of business models, growth / value-creation opportunities, as well as scale and depth of impact. For each of the defined focus areas, a comprehensive pipeline of direct and fund investments is maintained.

1 Risk-adjusted returns refer to returns taking into account potential drags to performance.
Source: PG Impact Investments.
4. Impact approach

PG Impact Investments advises on and invests in funds and companies that have implemented into their core business demonstrated value-add to society. Our firm believes that for an investment to be considered impactful, the following criteria must be fulfilled:

- A societal challenge or gap must be identifiable
- A beneficiary group must be identifiable
- A clear link between the activities and outputs of the business and the intended outcomes/impact for the target beneficiary group must be established
- Impact Key Performance Indices (KPIs) must be measurable

The assessment and management of the social and environmental impact form an integral part of the investment management process. During the deal generation and pre-selection phases, PG Impact Investments selects investments where impact and financial returns go hand-in-hand. During due diligence and investment analysis phases, PG Impact Investments assesses the scale, depth and additionality of the impact generated by the investment. In addition, environmental, social and governmental (ESG) risks and opportunities are identified together with management. Impact targets and measurements are defined and agreed upon by which the investment is closely monitored during its lifecycle. At exit, thorough consideration is given on how the impact mission can be protected under a new ownership structure.

Impact assessment framework

PG Impact Investments is actively contributing to the development of an industry-wide impact assessment framework. PG Impact Investments was one of the first global impact investment firms to adopt and integrate the work and findings of the Impact Management Project\(^1\) (IMP) in its Due Diligence process. In particular, the framework adopted IMP’s five dimensions of impact: What, How much, Who, Contribution and Risk:

Source: PG Impact Investments as of 31 December 2019.
Integration of global Sustainable Development Goals

PG Impact Investments impact objectives are fully aligned with the United Nations’ Sustainable Development Goals (UN’s SDGs). Priority is given to the people-oriented goals (SDG 1-10) with the aim to end poverty and hunger; ensure healthy lives and well-being; offer inclusive and equitable quality education; provide access to affordable and clean energy; promote sustained, inclusive and sustainable economic growth and decent work; build resilient infrastructure and sustainable industrialization; and to reduce inequality.

To ensure alignment with the SDGs, PG Impact Investments develops a logic model for each investment that links the investees’ Outputs to Outcomes, Impact and applicable Sustainable Development Targets (SDTs).

Inputs
What resources, financial and non-financial have been invested in order for the outputs to occur?

Outputs
The specific activities and outputs generated

Outcomes
Changes for stakeholders in terms of long-term condition or status

SDG Impact
Changes for wider society resulting from outcomes for stakeholders

PG Impact Investments portfolio companies and fund investments may support several SDGs. As shown in the example on the right, individual investees may address multiple social- and environmental-oriented SDGs simultaneously.

The illustration below shows what SDGs our portfolio companies and fund investments currently are supporting.

Relative contribution to Sustainable Development Goals¹

1 Size of colored areas show how many investments are supporting a specific SDG in relation to other SDGs. One investment can support different SDGs simultaneously. Size of colored area is not representative of amounts invested or depth / scale of impact generated by the investments.

Source: PG Impact Investments as of 31 December 2019.
**Inputs**

- PG Impact Investment’s investment in Tropical Landscapes Facility I, the first Indonesian green bond to fund Royal Lestari Utama, a sustainable natural rubber plantation

**Outputs**

- New jobs created through direct employment by RLU
- Engaging smallholder farmers, provision of technical assistance and training
- Community engagement
- Reforestation of heavily degraded landscapes
- Creation of natural habitat protection zones
- Sustainable natural rubber production

**Outcomes**

- Improved employment opportunities in low-income areas
- Smoothed income for farmers, fair pricing and integration into supply chain
- Community development activities, build social infrastructures
- CO2 absorption and storage
- Sustainable forest restoration
- Natural habitat expansion
- Reduction in poaching activities
- Reduction of illegal logging
- Enhanced agricultural standards
- Best-in-class agronomic technologies, sapling and milling

**SDG Impact**

- **Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all**
- Take urgent action to combat climate change and its impacts
- Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, halt and reverse land degradation and halt biodiversity loss
- Ensure sustainable consumption and production patterns

IFC Operating Principles for Impact Management

In 2019, the International Finance Corporation launched a new framework, the Operating Principles for Impact Management ("IFC Principles"), that establishes a set of best practices for impact management. The IFC Principles, which were developed in collaboration with key stakeholders from the impact investment community, require Signatories to ensure an integration of these good practices throughout the manager’s full investment cycle, and more importantly, they encourage broader transparency and knowledge-sharing across the industry.

PG Impact Investments welcomes the establishment of the IFC Principles as they foster increased accountability for both veteran impact managers and newcomers alike. As a platform that is exclusively dedicated to impact investing, PG Impact Investments’ management policies, tools and processes are fully aligned with the Principles.

PG Impact Investments has engaged Tideline – a leading US impact consulting firm – to review its impact management practices with the view to publishing an independent verification of our alignment with the Principles in 2020.

1. Define strategic impact objectives, consistent with the investment strategy
2. Manage strategic impact on a portfolio basis
3. Establish the manager’s contribution to the achievement of impact
4. Assess the expected impact of each investment, based on a systematic approach
5. Assess, address, monitor and manage potential negative impacts of each investment
6. Monitor the progress of each investment in achieving impact against expectations and respond appropriately
7. Conduct exits considering the effect on sustained impact
8. Review, document and improve decisions and processes based on the achievement of impact and lessons learned

Publicly disclose alignment with the IFC Principles and provide regular independent verification of the alignment

Whilst the independent verification is in progress, PG Impact Investments has undertaken a self-assessment of performance to date – please see the illustrative examples of our alignment with the Principles on the following page.

</tbody>
</table>
| 1 Define strategic impact objectives | • Investment strategies consistent with the firm's mission to "improve lives of underserved people"  
• Explicit integration of SDGs in investment strategies via logic models  
• Definition of clear impact objectives at portfolio- and investee-level and use of measurable impact metrics |
| 2 Manage impact on a portfolio basis | • Investment process guided by clearly defined impact criteria  
• Systematic impact assessment process based on the IMP framework  
• Management of impact post-investment through impact and value creation initiatives and regular monitoring  
• Alignment of staff incentive systems with the achievement of impact |
| **Origination and structuring** |  |
| 3 Establish contribution | • Provision of flexible financing to social enterprises in markets underserved by traditional investors  
• Engagement with management on impact and value creation initiatives  
• Manager's contribution evidenced by case studies |
| 4 Systematically assess expected impact | • Clearly defined, systematic process to assess and quantify expected impact of investments, incorporating the IMP's impact dimensions, standardized metrics (e.g. IRIS) and SDG targets  
• Proprietary scoring system to ensure standardization and comparability of impact and ESG assessments (across sectors and asset classes) |
| 5 Manage potential negative impacts | • Comprehensive Impact and ESG assessments in place  
• Clearly defined process to identify, avoid and mitigate Impact and ESG risks during screening and diligence phase  
• Integration of ESG considerations in the IC's investment decision-making process  
• Ongoing impact performance monitoring and ability to engage in response to unexpected risks |
| **Portfolio management** |  |
| 6 Monitor progress against expectations | • Alignment on core impact metrics and reporting requirements captured in legal documentation  
• Predefined process to collect impact data from investees  
• Regular review of actual vs. expected impact performance  
• Reporting through comprehensive annual impact report |
| 7 Consider sustained impact at exit | • Proactive sourcing based on impact themes, with priority for businesses with impact built into the business models  
• Likelihood of impact mission preservation is assessed during due diligence process  
• At exit, considerations given to sustainability of impact alongside financial outcomes |
| **Impact at exit** |  |
| 8 Improve decisions and processes based on learnings | • Clearly defined process to review and document each investee's impact performance (quarterly monitoring, impact report)  
• Clearly defined process to improve operational, strategic and management processes based on lessons learned  
• Global Executive Board responsible for further development of impact framework |

Impact performance

PG Impact Investments tracks social and environmental performance of its investment strategy over time. The impact assessment evolution focuses on:

- Number of lives touched and committed capital to measure the scale of impact
- Revenue growth as a top-line indicator of investee performance
- Job creation data given its close link to economic growth and social development
- Gender equality metrics to monitor gender performance
- Rural outreach to assess the breadth of impact
- Carbon footprint evaluation to review the strategy’s environmental implications

Lives touched and committed capital

Since 2018, PG Impact Investments’ impact footprint, as estimated by the number of lives touched, has grown 73.3%. While the platform has completed thirteen new investments, it is the growth of existing direct portfolio companies that has accounted for the majority of the increase in this impact metric.

Revenue growth

It is vital that the positive outcomes generated can be scaled over time as companies grow. Thus, PG Impact Investments values firms with a high potential to grow; its investees have delivered a solid revenue growth of 55.0% having outperformed the wider market in emerging markets. PG Impact Investments’ investments in financial inclusion and agricultural sectors have been the key contributors to growth across the portfolio.

Job creation

PG Impact Investments’ investees provide opportunities for regular, full-time employment, allowing for a stable source of income to employees and thus contributing to local economic development. PG Impact Investments supported employment of over 21,200 individuals as of December 2019. The growth of existing portfolio companies has created over 1,280 new local jobs. The job distribution by regions is largely aligned with the geographical breakdown of the investment portfolio. PG Impact Investments captures the qualitative aspects of jobs by ensuring that investees have adequate labour, occupational health and safety policies and practices, which are reviewed as part of the due diligence process.

---

1 Includes four “top-ups” to existing portfolio investments (three direct debt, one primary).
2 Figures are attributable to PG Impact Investments’ pro-rata share of capital invested relative to each investee’s total capitalization.
3 Figures are based on the aggregated data collected from direct investees of PG Impact Investments.

Source: PG Impact Investments as of 31 December 2019.
Gender equality

As part of work to foster women’s empowerment and gender equality globally, PG Impact Investments monitors investees’ gender performance. In 2019, PG Impact Investments’ investees served over 548,700 female clients1 – investments in Banco Pichincha, Bayport Mexico, Cooprogreso and LOLC Cambodia have been the key contributors to this.

Furthermore, PG Impact Investments monitors gender dynamics within its own organization. As of March 2020, female employees accounted for 37.5% of total headcount and 28.6% of Investment Committee members were women.

Rural outreach

Looking to evaluate the breadth of impact, PG Impact Investments estimates the rural outreach of its investees, where this data is available. Among the portfolio companies who reported this data in 2019, 96.6%2 of clients were living in rural areas – with Greenlight Planet, LOLC Cambodia and Cooprogreso investments accounting for a significant share in this.

Greenhouse gas emissions

We are committed to improving living conditions of underserved people by facilitating job creation and furthering access to goods and services to support economic and social development, but we recognize that this may potentially conflict with preserving the environment as some investment activities inevitably generate CO2 emissions.

By promoting affordable, clean energy solutions and agricultural activities facilitating re-forestation, we look to offset the CO2 emissions generated by our portfolio companies. In 2019, Greenlight Planet, TLFF and Acceso Crediticio have been the key contributors to reducing PG Impact Investments’ environmental impact – it is estimated that together they have facilitated the savings of over 1,220,000 tCO2e. Other investments reducing our carbon footprint include Runa, which looks to plant 1.2 million Guayusa trees in Ecuador, and Shared-X, which oversees and supports cultivation of over 4,800 hectares of farmland with a focus on sustainable land management.

With air travel, we are able to stay close to our clients, source new investment opportunities and work with our portfolio companies – all to achieve better results for our beneficiaries. CO2 emissions from our corporate air travel are fully offset as part of Partners Group’s collaboration with Natural Capital Partners, a leading expert on carbon neutrality and climate finance. In 2019, Partners Group teamed up with Natural Capital Partners to build a global portfolio of low carbon sustainable development projects that it is financing in order to offset its CO2 emissions from corporate air travel according to the highest international standards.

---

1 Figures are based on the total aggregated data collected from direct investees of PG Impact Investments that shared gender metrics.
2 Figures for rural clients are based on the total aggregated data collected from direct investees of PG Impact Investments that shared rural metrics. Figures for total clients represent the total aggregated data collected from direct investees of PG Impact Investments.

6. Impact sectors
Inclusive finance

Challenges

Globally, 1.7 billion adults are unbanked and have no access to formal financial services. As a result, they are unable to take advantage of basic economic tools such as savings, credit, money transfers or insurance. This results in them being vulnerable to shocks such as job losses or unsuccessful harvests. Access to financial services would enable them to protect their families, hedge against risks and invest in their future.

Microfinance institutions (MFIs) tackle some of these issues by providing credit and increasingly deposit and saving services to over 140 million micro entrepreneurs in emerging markets in 2018. These people have benefited from credit and financial services extended by more than 10,000 MFIs operating worldwide.

Despite the successful work of these MFIs, a large portion of the target population remains unserved. New business models are needed to broaden access and to reduce costs.

Investment themes and strategies

- **Microfinance**: support microfinance institutions in underserved areas that provide small loans to informal businesses to further penetrate underserved segments and markets.
- **Specialty financial services**: pensions, savings, investment and insurance services allow low income individuals in emerging markets to mitigate the risk of income shocks and shortfalls that could otherwise push them into extreme poverty.
- **Fintech**: application of technology to traditional business models (e.g. digitalization of MFIs, online remittances, personal finance) and development of new technologies. These new models help broaden the access to financial services and reduce transaction costs.

“A USD 1,700 loan allowed us to set up a small groceries store in our house. Now we can have an additional income besides our pension.”

(Entrepreneur in Oaxaca, Mexico)
Banco Pichincha seeks to catalyze responsible and sustainable development in Ecuador by providing affordable and appropriate financial products and services – including housing loans, micro credit and savings, remittances and micro insurance products – to underserved clientele. 384,600 microfinance clients served in Ecuador.

Bayport Mexico aims to increase access to basic financial services for underserved populations across Mexico. The Mexico City based lender provides unsecured payroll loans to public sector employees, primarily teachers and healthcare workers. 76,500 underserved individuals served in Mexico.

Cooperativa de Ahorro y Crédito Cooprogreso Ltda, offers quality financial products and services to support economic development of its members and their communities in Ecuador. Founded 50 years ago in the village of Atahualpa, located in a small rural mountain area in central Ecuador, Cooprogreso now operates through a branch network that spans across seven provinces. 266,500 cooperative members served in Ecuador.

LOLC (Cambodia) Plc, seeks to improve the lives of rural low-income Cambodians by offering a diverse suite of relevant and socially mindful financial and non-financial products including microcredit to households living in peri-urban and rural areas. 270,000 rural Cambodians served.

PG Impact Investments further improves access to financial services – including insurance, savings, credit, payments and pensions – for underserved populations across emerging markets through its strategic partnerships with leading impact funds such as Accion Frontier Inclusion Fund, L.P., Accion Quona Inclusion Fund, L.P., Apis Growth Fund II L.P., BlueOrchard Microfinance Fund, Growth Catalyst Partners LLC and LeapFrog Emerging Consumer Fund III LP. 2.3m individuals served globally.

Note: Impact KPIs for fund investees reflect reported aggregated available impact KPIs for the funds’ underlying portfolio companies. The investee data is based on the latest available information. Source: PG Impact Investments as of 31 December 2019.
In developing countries, almost 162 million formal micro, small and medium enterprises ("MSMEs") exist, of which the vast majority are micro businesses, creating millions of jobs and contributing to growth. Hence, MSMEs are often seen as the engine of economies.

However, 65 million formal MSMEs in developing countries lack access to external financing, and thus are constrained in their expansion and innovation. It is estimated that the unmet financing demand of these MSMEs amounts to USD 5.2 trillion, which is equivalent to 19% of the GDP of the developing countries. This results not only in lower growth in the respective economies but also in less job creation.

**Investment themes and strategies**

- **Small and medium enterprise lending**: providing working capital, expansion capital and more traditional corporate lending solutions to 65 million MSMEs who are not serviced by banks.

- **Fintech**: by leveraging technology developments, financial technology institutions are able to provide solutions that are efficient and effective at a lower scale, especially if compared to traditional banking institutions.

"NeoGrowth helped me with funds at the right time to grow my business specially when a large number of other financial institutions were turning me down."

(Nisha Chopra, Owner, Karan Overseas, Delhi, India)

Affordable housing

More than one billion people around the world live in inadequate, unsafe and / or informal settlements. After years of progress from 2000 to 2014, when the proportion of the urban population living in informal settlements decreased by 20%, the figure increased again, growing from 23.0% in 2014 to 23.5% in 2018.

The need for decent housing is especially strong in emerging markets, where 200 million households live in slums. In fact, the number of individuals living in slums increased from 689 million in 1990 to one billion in 2018. This trend is expected to continue as urbanization and population growth are outpacing the construction of new affordable housing. By some estimates 1.6 billion people will lack decent or affordable housing by 2025.

Affordable housing also remains a challenge in advanced economies: 60 million households are financially stretched by housing costs across the United States, the European Union, Japan and Australia; in the United Kingdom alone, over one million households are on waiting lists for government-subsidized housing.

“I would just like to let you know how much we enjoy staying in Candlewood Crescent. We feel so safe and everyone is so friendly. The security is extremely friendly and I like that they do not just let anyone enter the complex. We have enjoyed our stay a lot these last couple of months since we have moved in.”

(Riana & Conrad, Candlewood Crescent residents, South Africa)

Affordable housing – portfolio overview

**Bridge’s Workforce and Affordable Housing Strategy (Bridge WF)** aims to preserve and rehabilitate workforce and affordable housing assets in high growth markets throughout the US. Bridge WF not only provides quality affordable housing to cost burdened households but invests in social services and community spaces to further improve tenant well-being.

- **7,067** affordable housing units financed in the USA.

**Cheyne Social Property Impact Fund** aims to provide decent affordable housing in the UK to >5,000 households in need by building or purchasing properties and leasing them to social sector organizations that provide social housing services to disadvantaged groups (e.g. sheltered accommodation, care homes, etc.).

- **960** affordable housing units financed in the UK.

**IHS Fund II SA** is a specialist real estate fund, managed by International Housing Solutions, that generates affordable housing for lower- and middle-income families in South Africa, aiming to reduce the number of families living in slums or informal housing and improve access to employment, education, health, security and wealth.

- **10,850** affordable housing units financed in South Africa.

Note: The investee data is based on the latest available information. Source: PG Impact Investments as of 31 December 2019.
Challenges

More than 617 million children and adolescents of primary and lower secondary school age lacked minimum proficiency in reading and mathematics in 2015. Around 205 million (33%) of those children did not have access to education while the other 412 million children (67%) attended school but did not become proficient because they dropped out or did not learn basic skills.

Adequate infrastructure and teacher training are critical for the quality of education. However, in many developing countries, schools often lack basic resources such as consistent electricity. Across Sub-Saharan Africa, for example, less than 50% of schools have access to drinking water, electricity, computers and internet.

In the long-term these challenges do not only compromises individual’s efforts to climb out of poverty but also threatens the economic prosperity of entire nations. Without skilled human resources these countries will struggle to compete in a global marketplace.

Investment themes and strategies

- **School financing:** providing financial resources to schools to offer basic resources and high-quality education to its students at affordable prices
- **Vocational training:** increasing employability of low skilled workers by teaching job-relevant skills
- **Online education:** leveraging technology to provide quality education at affordable prices to broaden access to education
- **Education financing:** Increasing access to higher education to low-income populations by providing student loans

“Our financial partnership with Varthana has helped us complete the construction of the school building and build stable classrooms. Academic support from Varthana has enhanced the development of teachers and students.”

(Owner of Aakash Vidyalaya School, India)
Thirumeni Finance Private Limited ("Varthana") is a leading non-bank financing company that focuses on lending specifically to affordable private schools, with a mission to improve access to quality education in low-income communities in India. School owners use the loans to expand their infrastructure, invest in teacher training and introduce new learning methods into their classrooms.

3'680 affordable private schools served across India
Challenges

Approximately 840 million people globally still lack access to electricity, the vast majority of whom live in rural areas. Without energy access – one of the key drivers of development and improvement of livelihoods – people are impeded from lifting themselves out of poverty.

Sustainable off-grid electricity providers are tackling this problem. Over the last 10 years, 420 million people have gained access to off-grid solar solutions, saving around USD 5.2 billion that they would have otherwise spent on less environmentally-friendly and more expensive energy sources.

By 2030, it is expected that 823 million individuals across the globe will utilize off-grid solar solutions, as technological advances and falling prices make these products available to a growing number of users.

Investment themes and strategies

- **Solar lights**: affordable clean lighting solutions, with daily financing payments below the displaced cost of kerosene, resulting in increased savings, positive health effects and improved environmental outcomes
- **Solar household systems**: affordable clean energy access solutions with low upfront costs and medium-term financing
- **Mini-grids**: decentralized, off-grid community-level clean energy solutions
- **Clean cooking**: affordable clean-burning cook-stoves with significantly lower charcoal / firewood consumption, fuel and indoor pollution which ranks fourth among serious threat to health

"I am now able to work even in the odd hours of the day. I love the intensity of the light and the long-lasting quality of the lamp. I am now able to devote more time to other household chores as well. With these lamps, I now plan to have multiple sewing machines and more people working under me. I aim to open a tailoring school to finally identify success.”

(Shikha Dutt, a seamstress in Howli, Assam, India and owner of a Sun King Home 60)
Greenlight Planet delivers affordable energy by designing, distributing and financing “Sun King” solar products to the world’s one billion under-electrified consumers. Most of these consumers were previously reliant on expensive fossil or biomass fuels. Switching to solar results in quantifiable cost savings, improved quality of life and clear environmental benefits.

10.7 million households electrified globally

Note: Investment was exited in 2019. The investee data is based on the latest available information. Source: World Bank, PG Impact Investments as of 31 March 2019.
Challenges

With 151 million children under the age of five chronically undernourished globally, an efficient agriculture sector is essential for reducing hunger, improving food security as well as resilience to disasters and shocks.

However, government spending on agriculture in relation to its contribution to the economy fell by more than 38% between 2001 and 2017 increasing the need for private capital investments.

In addition, 40-85% of all food producers in Africa, Asia and Latin America are small-scale farmers compared to 10% in Europe. These farmers not only face difficulties growing sufficient food to nourish their families but also lack know-how, capital, direct market access and storage facilities.

Also, smallholder farmers in emerging markets face a significant yield gap, only realizing c. 20% of their theoretical potential yield versus 80% in the developed world.

Investment themes and strategies

- **Fair trade, supply chain & ethical consumer brands**: strengthening the value chain from smallholder farmers, through fair traders to ethical brands, driving demand for sustainable and ethically sourced food products and allowing the smallholder farmers to achieve higher prices and thus yields.

- **Agri-business**: investing in inclusive agri-businesses that provide transparency and income stability to smallholder farmers, and helping them to collapse the yield gap through know-how transfer, education and provision of inputs such as seeds and nutrients. Efficiently run agri-businesses can lower resource-intensiveness, reduce food waste and promote regional trade.

"The existence of partnership with RLU is very satisfying for us, especially the integrated farming program. We used to buy our own vegetable needs before having this program, but now we consume the products that we have planted and sell the remaining stock. We are grateful to have a partnership with the company. We hope that this partnership will be long-term and mutually beneficial between the community and the company."

(Hasmon Ovezar, Head of Karang Jaya Farmers Group, Indonesia)
Runa owns and operates the world’s only supply chain of Guayusa to then manufacture energy drinks and ready to drink teas which are sold in over 10’000 stores in the US. Runa works in close partnership with the local Kichwa people of Ecuador to source Guayusa leaves from independent farming families providing them with additional income, technical knowledge and market access.

2’300 Ecuadorian smallholder farmers’ lives improved.

Shared-X produces high yields of specialty and organic crops alongside smallholder farmers. Under this Impact Farming model, smallholders have access to modern technologies and reach premium international markets, resulting in significantly higher incomes that truly lift communities out of poverty.

298 smallholder farmers in market access programs.

Tropical Landscape Finance Facility provides long-term financing to PT Royal Lestari Utama (“RLU”), an operator of a sustainable rubber plantation in Indonesia. RLU provides steady income to low income farmers, at a wage over 2x higher than the regional average. The company also facilitates access to technical assistance and rubber tapping training, allowing the farmers to obtain increased pricing for their rubber and increase their incomes.

4’653 jobs created across Indonesia.

PG Impact Investments further supports low income and smallholder farmers in the Food & Agriculture value chains across Africa and Asia through commitments to leading impact funds including Ethos Mezzanine Partners 3 and Growth Catalyst Partners LLC.

23’400 farmers supported across India and Malawi.

---

1 In 2018, Runa was sold to All Market Inc., a US-based beverage company that manufactures and distributes coconut water based drink (Vita Coco) in the US and globally. As a result, PGII no longer receives impact KPIs for Runa. 
Note: The investee data is based on the latest available information.
Source: PG Impact Investments as of 31 December 2019.
**Healthcare**

Globally in 2018, 3.9% of children died before reaching five years old (WHO)

- **Latin America**: 1.4% early childhood deaths
- **Africa**: 5.3% early childhood deaths
- **Asia**: 2.4% early childhood deaths

**Challenges**

In 2018, 5.3 million children died before reaching the age of five. The vast majority of these lives could have been saved with simple and cost-effective care, but according to the World Health Organization, at least half of the world’s population does not have access to essential healthcare services.

Traditionally, government is the biggest healthcare provider to the poor with charities and NGOs playing a complimentary role. However, many countries suffer from scarce supply of fundamental infrastructure, facilities and trained medical staff. Access to good-quality medication, devices and supply is an additional challenge as in many markets these are provided by informal vendors that often sell inappropriate or counterfeit products.

A further challenge is the management of large-scale health projects, where a lack of transparency of information leads to inefficient and ineffective allocation of funding to target initiatives where help is needed the most.

**Investment themes and strategies**

- **Healthcare delivery companies**: focusing on affordable care models (e.g., out-patient clinic networks, in-patient hospital networks, specialist networks)
- **Healthcare micro-insurance**: services that complete the market for affordable healthcare
- **Pharmaceuticals**: provide access to affordable and high-quality medical products
- **Healthcare sector infrastructure**: ancillary services that allow for a more efficient deployment of available resources in the healthcare sector

BroadReach celebrates with the South African Department of Health as Ugu is announced to be the first district in the country to reach the UNAIDS 90-90-90 HIV targets towards epidemic control. They attribute this success to Vantage giving them oversight and timely data to make decisions and plot action".

(Natal Department of Health, South Africa)

7. New portfolio investments
**Company description**

Edpyme Acceso Crediticio SA ("Acceso Crediticio") was founded in 1999 by experienced Peruvian entrepreneurs to provide innovative financing solutions for individuals and enterprises that are not properly served by the traditional banking system. Since 2010, Acceso Crediticio has specialized in providing loans to self-employed taxi drivers to purchase natural gas vehicles ("NGVs") and more recently has diversified into other transport activities such as financing light utility vehicles for small and medium-sized enterprises ("SMEs") as well as more energy efficient fleets for bus route operators.

**Social challenges**

Micro-entrepreneurs (i.e. taxi / Uber drivers) often cannot afford a vehicle; these types of borrowers are trapped renting indefinitely from an owner and unable to save up capital to purchase a productive asset.

Rapid urbanization, industrial growth and a highly contaminating public transportation system have created serious environmental problems in the country. According to the World Health Organization, Lima’s air is the most polluted in Latin America.

**Target impact**

- Broaden access and provide high quality financial services to financially underserved individuals and micro/small entrepreneurs in Peru
- Reduce CO2 emissions in the country by financing NGVs and other energy efficient vehicles

Asian Institute of Gastroenterology
Direct, Equity

Company description
Asian Institute of Gastroenterology ("AIG") is India’s foremost Gastroenterology hospital, which offers comprehensive healthcare services across eight key Centers of Excellence - Medical & Surgical Gastroenterology, Liver Sciences, Organ Transplant, Pulmonary Sciences, Renal Sciences, Oncology, Cardiac Sciences and Obesity & Metabolic Therapy.

AIG enables low and middle-income populations to gain access to highest quality and affordable healthcare services by operating an inclusive and efficient business model. In addition, AIG has a strong focus on innovation, research and provides training to doctors across India and other emerging markets.

Social challenges
The public healthcare system in India provides only very limited secondary and tertiary care. More than 80% of India’s population lacks significant health insurance coverage and c. 65% of healthcare spending is out of pocket. Every year more than 60 million Indians are pushed into poverty because of medical expenses.

Target impact
- Bridge the gap in supply and access to affordable, high quality healthcare services by operating an inclusive and efficient business model
- Highest efficiency in the market allowing for affordable pricing, ~30% of patients from lowest income populations
- Reserved bed capacity for underserved patients.
- Mobile programs to rural areas, which so far have reached > 10 million Indians.

Cooprogreso
Direct, Debt

Company description
Cooprogreso was founded 50 years ago by a group of 32 visionaries in Atahualpa, a small rural area of Quito, the capital of Ecuador, to foster the economic development of its community. Over time, it has become one of the main regulated credit unions in Ecuador, serving more than 266,467 beneficiaries through 28 offices in seven provinces of the country.

Social challenges
Ecuador’s population is 16.6 million, of whom 23.2 per cent are in a state of poverty. A large part of the economically active population, are small business owners and/or self-employed workers who are generally excluded from traditional financial services, leading to increased vulnerability and financial complications.

Target impact
- Extend financial inclusion to small and medium-sized enterprises and vulnerable people in Ecuador
- Increase the standard of living of clients by reducing their vulnerability to economic, social and environmental shocks

i-Finance Leasing
Direct, Mezzanine

Company description

Founded in 2014, i-Finance Leasing Plc ("i-Finance") works to improve livelihoods by offering affordable and accessible leases. These leases target low-income individuals and micro-small and medium enterprises ("MSMEs") in Cambodia to purchase productive assets such as motorbikes, cars and appliances or equipment.

While most Cambodian financial institutions, including microfinance institutions, tend to require land collateral to advance loans, i-Finance provides leases solely secured by the asset itself. This allows the company to reach more underserved and lower income clients beyond the scope of traditional lenders as demonstrated by its customer base: over 50% of i-Finance’s customers are first-time borrowers and the average household income of its clients is USD 4’800, lower than that of top Cambodian microfinance institutions.

Social challenges

Despite over two decades of positive economic growth, over three million of Cambodia’s population of 15 million remains below the national poverty line – approximately 90% of these individuals live in a rural environment with limited access to traditional financial services. MSMEs employ 70% of Cambodia’s workforce and produce 60% of GDP, yet just 27% of these have access to formal financing.

Target impact

- Offer access to over 25,000 clients by 2022, largely by expanding geographic footprint
- Focus on first-time borrowers, primarily targeting low-income individuals

Tropical Landscapes Finance Facility I
Direct, Debt

Company description
The Tropical Landscapes Finance Facility ("TLFF") is an initiative created by the UN Environment Program, World Agroforestry Centre, ADM Capital and BNP Paribas in alignment with the Indonesian government. TLFF seeks to bring long-term finance to projects and companies that stimulate green growth and improve rural livelihoods. TLFF’s first green bond, TLFF I provides much needed growth capital to a sustainable natural rubber plantation in the Jambi and East Kalimantan provinces of Indonesia.

Social and environmental challenges
Indonesia represents the world’s third largest area of tropical forests, however, in part due to its alarming deforestation rate the country is also one of the largest greenhouse gas emitters on the planet. Host to significant volume of endangered species and underserved, indigenous peoples living in these regions, Indonesia remains in need of rural jobs and habitat protection.

Target impact
- Create upwards of 16'000 fair wage jobs
- Provide training for 24’000 smallholder farmers
- 34’000 hectares of degraded landscapes to be reforested with rubber trees
- Offset 8.3MT CO2 emissions
- Provide a buffer zone to protect a national park and its endangered wildlife

Varthana
Direct, Debt

Company description
Founded in 2012, Thirumeni Finance Private Limited (“Varthana”) is a leading non-bank financing company that lends specifically to affordable private schools. The firm’s mission is to improve access to quality education in low-income communities in India.

To date, Varthana’s loans have assisted c. 3’680 schools teaching c. 3.8 million students and employing over 125’000 teachers.

Social challenges
India has experienced a tremendous social and economic growth over the past few decades. However, the public school system has struggled to keep pace with that development and with the demand for education among the largest school-aged population in the world. An emerging sector of private schools delivering high quality education at affordable prices now helps to meet the growing needs of over 270 million students. These schools often face difficulties in accessing financing to scale their operations.

Target impact
- Increase access to quality education in low-income communities in India
- Increase the capacity and resources at high-quality affordable schools – Varthana’s financing solutions tailored specifically for these institutions provide the capital to invest in technology, new classrooms and even transport systems to help students reach their schools

Ethos Mezzanine Partners 3
Primary, Mezzanine

Company description
Ethos Mezzanine Partners 3 provides mezzanine capital to mature medium-sized businesses in Sub Saharan Africa, across a variety of sectors ranging from manufacturing and agriculture to healthcare and telecommunications.

Social challenges
SMEs are a major driver of economic development and poverty alleviation in Sub Saharan Africa. They tend to employ a large share of vulnerable sectors of the workforce and can sometimes be the only source of employment in rural areas. Access to finance is considered to be a key challenge for SME growth: only 10% of SMEs in Sub Saharan Africa are estimated to have access to a loan. There is an underserved segment of mature SMEs that are large actual or potential employers and thus too large for microfinance, but too small or perceived as too risky for bank financing, and whose founders do not wish to cede control to equity investors.

Target impact
- Provide financing to underserved mature SMEs in Sub Saharan Africa with potential for significant job creation
- Help maintain and create jobs, particularly for underserved populations at or near the base of the economic pyramid, women, youth and those in rural areas – targeting a 25% increase across the portfolio
- Through a robust ESG framework, help ensure that jobs created are good quality and equitable and that investees improve sustainability and contribute to climate change mitigation

Quadria Capital II
Primary, Equity

Company description
Quadria Capital II (‘Quadria’) provides growth equity capital to healthcare companies in South and South East Asia, across a range of subsectors, including healthcare delivery, life sciences, healthcare services and medical devices. In addition, Quadria leverages the wealth of specialized healthcare expertise of its investment and operational teams to provide value creation and strategic support to its portfolio companies.

Social challenges
Countries in South and South East Asia account for c. 30% of the world’s population, but c. 40% of the global disease burden. Further, the often ageing, under-developed and over-stretched healthcare systems in the region command only 5% of global public healthcare spending, resulting in only 0.5 hospital beds per 1,000 people (vs. the WHO recommendation of five) and 0.3 physicians per 1,000 people (vs. four in developed economies). This challenge is particularly acute in non-metro locations and for low-income groups.

Target impact
- Provide growth financing to healthcare companies in South and South East Asia helping to ensure greater access, affordability, awareness and quality of healthcare goods and services to underserved populations
- Leverage Quadria’s in-house expertise to enable portfolio companies to achieve impact at scale, including increasing access to specialist care across portfolio companies
- Reach underserved populations by adding new hospital beds in non-metro locations and treating low-income patients

Appendix: Impact measurement methodology

Data sources
PG Impact Investments leverages internal and external data sources to measure the impact reported in the Annual Impact Report. Investee impact metrics included within the Annual Impact Report are based on information provided by the portfolio companies or calculated using reasonable internal estimates by PG Impact Investments.

Most investee data is self-reported, through custom or standard reporting required by the legal documentation. Portfolio companies utilize estimation techniques and proxy indicators where appropriate and in accordance with best practices.

As output metrics aim to reflect performance in the investees’ calendar year 2019, the majority of the data is as of 31 December 2019. However, some metrics presented are based on the latest information available at the time of publication or reasonable extrapolations by PG Impact Investments.

Portfolio impact
Although the contribution approach (e.g. an investor holds 10% stake in an SME lender that makes financial services accessible for 10’000 SMEs – therefore, the investor states that through its intervention it supports 10’000 SMEs) is a common practice in impact investing, PG Impact Investments believes that this methodology does not fairly reflect the actual impact generated by the investor’s capital and it leads to overstating of the results. Therefore, PG Impact Investments calculates the pro-rata impact that is attributable to its share of capital invested relative to each investee’s total capitalization. Of note, for fund investments, PG Impact Investments calculates its attribution on a “look-through” basis (i.e. tracking impact KPIs on a portfolio company basis).

While the funding provided by PG Impact Investments represents a crucial portion of the portfolio companies’ financing, it is important to note that this impact was not financed solely by PG Impact Investments’ capital and PG Impact Investments does not “take credit” for the full impact reported in this report.

Data presentation
Unless specified otherwise throughout the report, the impact metrics attributable to PG Impact Investments refer to the data for PG Impact Investments platform (i.e. consolidated data for PG Impact Investments I L.P. and other vehicles managed by PG Impact Investments AG).

Following methodology revision in 2019, 2018 metrics are re-stated and thus do not reconcile with the Annual Impact Report 2018.

Limitations
The majority of impact KPIs are presented at a given point in time – this approach is not fully reflective of the impact generated over time.

The impact reported on behalf of PG Impact Investments’ portfolio companies is not a full picture of the impact they had on the environment, in the communities they serve and the markets they operate in.

We are a global impact investment firm backed by Partners Group, one of the largest private markets investment managers in the world. PG Impact Investments was founded in 2015 with the vision that private investment, innovation and entrepreneurial talent can bring sustainable growth and provide solutions to the challenges facing our society. We serve an international clientele of professional investors who seek investment solutions that offer financial returns, while also helping to address pressing social or environmental challenges. Our origin dates back to 2006, when Partners Group established its employee-backed foundation PG Impact in the wake of the 2004 Asian Tsunami. Since then, Partners Group has conducted many impact investments through this foundation and, in 2015, decided to institutionalize its impact investing practice through the creation of PG Impact Investments.

While remaining independent from Partners Group, PG Impact Investments entities have full access to the global infrastructure, investment know-how and specialist resources of Partners Group. All profits from our business activities are transferred to our PG Impact Investments Foundation to support philanthropic activities.
